THIS AGREEMENT is made and entered into this 29th day of October, 2010 by and between Santa Fe County, hereinafter referred to as "the County", and Quest Diagnostics, Inc., (d/b/a Quest Diagnostics Clinical Laboratories, Inc.), a Delaware corporation located at 695 South Broadway, Denver, CO 80209-4003, hereinafter referred to as "the Contractor".

WHEREAS, pursuant to NMSA 1978, Sections 13-1-112 and 13-1-117, competitive, sealed proposals were solicited via a formal request for proposals, RFP No. 2010-0387-CORR/MS, for the provision of the professional services; and

WHEREAS, based upon the evaluation criteria established within the request for proposals for the purposes of determining the most qualified Offeror, the County has determined Contractor as the most responsive and highest rated Offeror; and

WHEREAS, the County desires to engage the Contractor to render medical laboratory testing services, and the Contractor is willing to render such services; and

WHEREAS, the County requires these services and the Contractor is willing to provide these services and both parties wish to enter into this Agreement.

NOW THEREFORE, in consideration of the premises and mutual obligations herein, the parties hereto do mutually agree as follows:

1. SCOPE OF WORK

The Contractor shall:

A. Perform initial and confirmatory testing for immunities and each drug or metabolite test at Contractor's laboratory. The laboratory shall be a New Mexico resident vendor located within an 80-mile radius of the County's Youth Development Program and the Adult Detention Facility.

B. Provide its own personnel and equipment necessary for performance under this Agreement, unless otherwise authorized by the County.

C. Conduct initial, and if necessary, confirmatory testing. Industry-standard test controls shall be utilized. Results shall be transmitted by the Contractor to the appropriate Health Administrator via fax, within five working days of specimen receipt or through an electronic medical record system accessible 24 hours a day, seven days a week with the ability to print laboratory results. Appropriate safeguards shall be used to ensure confidentiality of records by limiting access to authorized individuals.

D. Abide by the Health Insurance Portability and Accountability Act (HIPAA), 45 CFR Parts 160 to 164, and all other federal and state guidelines concerning confidentiality.

E. Confirm specimens that test positive. All confirmed positive specimens shall be placed in long-term frozen storage for a period of 365 days. If at the end of the 365-day period, the Contractor has not been notified by the user facility to retain a certain specimen, the Contractor shall dispose of that specimen. If a specimen initially tests negative, the Contractor shall dispose of that specimen.

F. Contractor's laboratory personnel shall consist of:

a) A scientist director for the drug-testing laboratory who meets the following criteria: i) holds a M.S. or Ph.D in pharmacology, toxicology or analytical chemistry; ii) has at least two years experience in analytic toxicology (i.e., the analysis of biological materials for drugs or abuse) and appropriate training and/or forensic applications of analytic toxicology (i.e., able to provide court testimony); and iii) has documented scientific qualifications comparable to those of a person certified by the American Board of Forensic Toxicology or the American Board of Clinician Chemistry in Toxicological Chemistry. The scientist director is responsible for ensuring that there are sufficient personnel with adequate training and experience to supervise and conduct the work of the urine drug-testing laboratory. The scientist director shall have medical laboratory testing training in the sciences mentioned above, with specific training in the theory and practice of the procedures used, including the recognition of aberrant results, and familiarity with quality control procedures.

b) A supervisor to direct the analysts. The supervisor shall possess a B.S. degree in chemistry or the education and experience comparable to a medical technologist certified by the American Society of Clinical Pathologists, MT (ASCP), or its equivalent. The supervisor shall have training in the theory and practice of the procedures used and an understanding of quality control concepts. Periodic verification of the supervisor's skills must be documented.

c) Technicians or non-technical personnel who possess the necessary training and skills for the task assigned. Contractor shall offer in-service continuing education programs to meet the needs of all laboratory personnel.

G. Quality Assurance and Quality Control

The laboratory shall have a quality assurance program, which encompasses all aspects of the testing process including: a) specimen acquisition; b) chain of custody; c) security; and d) reporting of results, in addition to the screening and confirmation of analytical procedures. Quality control procedures shall be designed, implemented, and reviewed to monitor the conduct of each step of the process.

H. Judicial Proceedings

The laboratory shall provide all services and testing in such a manner that all results and reports shall be developed so as to maximize the likelihood that they will be admissible in evidence in any administrative or judicial proceeding. The laboratory must also have processing technicians (and collections site personnel, if under laboratory contract) available for testimony.

I. Supplies

Provide OSHA-compliant types and amounts of supplies and materials necessary for the collection and preservation (such as safety-engineered devices with engineered sharps injury protections (SESIPs) needles/vacutainers, vials for blood draws, collection swabs, throat culture tubes, urine collection cups for drug testing, forms to order tests, sealing tapes, and bags), and transportation of specimens for laboratory tests as requested. Transportation and/or mailing materials are to include OSHA-compliant containers, address labels, special labels (as appropriate) printed on the outside of the container (e.g.; biohazard, fragile, does not freeze, etc.). Assure that sufficient types and quantities of supplies and materials are available at each institution to preclude delays or result in a break in provision of contracted services.

J. Equipment

Provide two new centrifuge machines (at no charge), one at the Youth Development Program (YDP) and one at the Adult Detention Facility (ADF). All upgrades made to the equipment, hardware and re-agents must be conducted by Contractor for the term of this Agreement. Contractor shall provide for the following maintenance on the centrifuge machines: a) telephone technical support for problem solving with availability within a response time not to exceed three (3) hours, Monday through Friday from 8:00 a.m. to 5:00 p.m.; b) if issue is unsolvable by telephone, then on-site technical services shall be available to correct the problem(s) within two (2) working days from report of the problem, Monday through Friday from 8:00 a.m. to 5:00 p.m.

K. Specimen Handling, Transporting, and Reporting Results

Provide for the handling, processing, and reporting of results for all clinical laboratory, tests, and procedures requested by authorized representatives from the Santa Fe County Corrections Department. This includes, but is not limited to, those tests listed in the Contractor's Net Fee Schedule. Contractor shall provide for scheduled pick-up, handling, and shipping of specimens to the Contractor's laboratory.

L. Certifications and Standards

Contractor shall assure that the medical laboratory testing services provided meets the standards of the American Correctional Association (ACA), College of American Pathology (CAP), College of American Pathologists Forensic Drug Testing (CAP FDT), and the Clinical Laboratory Improvement Act (CLIA).
